

SOLAR ENERGY SYSTEM FOR ISOLATED CLINIC

Solectric solar cell system can generate independent electrical power in remote health centers where the access to main power line is not available. Solar cell system converts sunlight to electricity for electric fan, lighting, electric pot refrigerator of cold storage vaccines, and other electrical appliances to serve basic requirements for hospital or clinic to help improve quality of lives of people in remote areas.

FEATURE : SLT-IC-1500/ SLT-IC-1000

- Package system includes all necessary parts.
- The independent power stations are designed for mobility and ready to use without installation work.
- Solar module and structures are designed for easy installation.
- The independent power station consists of charge controller, high efficient DC/AC inverter, battery and system operating indicators.
- Photovoltaic power generator utilizes highly efficient and power yield solar cells

OPERATING HOURS OF EACH MODELS :

Model	Fluorescent 18 W	Refrigerator 4-5Q	Electric Boiler 600 W	Fan 12 INCH	Pump 0.5 HP.	TV 14 INCH	Radio & CD 200 W ACD	Number of Module
SLT-IC-1000	4 lamp/5 Hrs.	All Day	30 Min	4 Hours	30 Min	5 Hours	6 Hours	8 (60 W)
SLT-IC-1500	6 lamp/5 Hrs.	All Day	1 Hour	2 Fans-6 Hrs	1 Hours	7 Hours	8 Hours	12 (60 W)
